

## ITES-4H CONTRACT AT A GLANCE

- CONTRACT NUMBER: W519TC-25-D-A062
- VALUE: \$10B IDIQ / 10 YEARS
- ELIGIBILITY: ARMY, DOD, AND ALL FEDERAL AGENCIES
- SCOPE: HARDWARE, SOFTWARE, AND IT SERVICES

### COPPER RIVER TECHNOLOGIES MISSION-FOCUSED IT MODERNIZATION, CYBERSECURITY, AND TACTICAL EDGE SOLUTIONS FOR SOCOM

**Copper River Technologies** (CRT), a tribally owned 8(a) enterprise and a \$500 million Alaska Native-owned organization, is uniquely positioned to support U.S. Special Operations Command (USSOCOM) through advanced IT modernization, cybersecurity, cloud engineering, enterprise networking, and tactical communications solutions. CRT brings a proven record of delivering secure, modern, and resilient technologies across the Department of Defense and federal civilian agencies. Our capabilities directly align with SOCOM’s mission to execute high-risk, time-critical operations requiring secure, rapidly deployable, and resilient IT systems in austere and contested environments.

SOCOM’s operational tempo demands secure, resilient, and rapidly deployable IT capabilities that support distributed operations, real-time intelligence, and mission command. Through ITES-4H, CRT provides rapid access to advanced hardware, integrated solutions, cybersecurity-aligned architectures, and enterprise modernization services that accelerate mission effectiveness and operational readiness.

Solutions available through the ITES-4H contract vehicle.

SOCOM MISSION SNAPSHOT	ITES-4H IS DESIGNED TO PROVIDE
Conducting global special operations missions	Enterprise-grade IT hardware and integrated solutions
Enabling distributed and time-critical operations	Modernization of legacy systems and infrastructure
Maintaining technological overmatch	Cyber-secure, interoperable, and scalable technologies
Ensuring secure and resilient communications	Rapid, flexible procurement pathways
Rapidly integrating emerging technologies	Support for cloud, data center, and network transformation

**MISSION-ALIGNED TECHNICAL EXPERTISE** CRT delivers end-to-end IT modernization tailored to SOF operational needs, including tactical edge computing, ruggedized systems, secure mobility and low-signature communications, cloud-ready architectures, Zero Trust-aligned cybersecurity, AI/ML-enabled analytics, and high-availability networks for denied, degraded, intermittent, and limited (DDIL) environments. These capabilities ensure SOF operators have secure, reliable access to mission-critical systems anywhere in the world.

**TACTICAL EDGE & DEPLOYED ENVIRONMENT SUPPORT** CRT delivers lightweight ruggedized compute and storage, mesh networking and resilient communications, deployable mission kits for rapid setup, secure mobility for forward teams, and cloud-enabled mission command tools optimized for low-bandwidth operations. These solutions enhance SOCOM’s ability to operate effectively at the tactical edge.

**CYBERSECURITY & ZERO TRUST INTEGRATION** CRT integrates Zero Trust architecture design, identity and access management, network segmentation and micro-segmentation, RMF-compliant secure baselines, continuous monitoring and threat detection, and supply chain risk management. These capabilities strengthen SOCOM’s ability to protect sensitive missions and maintain cyber dominance across all operational environments.

**MODERNIZING SOCOM'S C5ISR & ENTERPRISE NETWORKS** CRT's technical approach focuses on delivering secure, resilient, and interoperable networks through next-generation routing and SD-WAN, cloud-integrated architectures, Zero Trust enforcement across all enclaves, automation to reduce operational workload, and AI-driven performance and threat analytics. This enhances SOCOM's ability to maintain secure communications across global operations.

**ENABLING DISTRIBUTED, JOINT & COALITION OPERATIONS** CRT provides interoperable communications systems, secure cross-domain solutions, coalition-friendly architectures, and federated identity and access management. These capabilities ensure SOF teams can communicate and coordinate seamlessly across joint, interagency, and coalition partners.

**SUPPORTING RAPID TECHNOLOGY INSERTION** CRT enables rapid adoption of emerging technologies through agile engineering and prototyping, scalable integration and testing environments, close collaboration with operators and program offices, and rapid acquisition pathways through tribal 8(a) status. This accelerates SOCOM's ability to field new capabilities at the speed of relevance.

**PROGRAM EXECUTION & DELIVERY** CRT applies a disciplined program management framework aligned with DoD and SOCOM best practices, including dedicated program leadership, risk management and mitigation planning, configuration and change control, quality assurance, and transparent performance reporting. Our secure supply chain includes OEM-authorized distribution, DoD-compliant logistics and asset tracking, secure configuration and staging facilities, and rapid deployment for CONUS and OCONUS sites — ensuring SOCOM receives mission-ready hardware and integrated solutions on time and fully compliant.

**WHY COPPER RIVER TECHNOLOGIES** Copper River Technologies delivers the secure, modern, and mission-ready IT capabilities SOCOM requires to maintain global operational dominance. Our integrated IT modernization, cybersecurity, and tactical edge expertise directly enhance SOCOM's ability to operate securely, rapidly, and effectively in the world's most demanding environments. CRT stands as a trusted, mission-focused partner committed to strengthening SOCOM's operational advantage.

### COPPER RIVER TECHNOLOGIES AT A GLANCE

Federally recognized Alaska Native-owned enterprise

Tribally owned 8(a) certified entity

\$500M Alaska Native-owned federal contractor

Enterprise IT modernization and cybersecurity expertise

Proven DoD and federal past performance
