

DATA ANALYTICS

Delivering Insight, Accountability, and Mission Impact Through Data.

Copper River Technologies (CRT) and Coho Consulting Group (Coho CG) are mission-driven professional services firms in the Copper River Family of Companies specializing in federal transformation. We provide Data Analytics services that turn complex Federal data into actionable insight for mission execution, performance management, and executive decision-making.

CUSTOMER BENEFITS

- *Data-driven decisions grounded in accurate, trusted information*
- *Increased efficiency and cost savings through performance insight*
- *Transparent, defensible reporting for oversight and compliance*
- *Faster access to mission-critical insights*
- *Improved planning, forecasting, and resource alignment*

SMARTER DATA. FASTER DECISIONS. STRONGER OUTCOMES.

Our services include data integration, data quality improvement, KPI development, dashboards, and advanced analytics—delivered securely and aligned with Federal governance and compliance requirements.

Services typically include:

- **Data Discovery & Assessment** – Evaluate data sources, quality, and gaps to establish a reliable analytics baseline.
- **Data Integration & ETL** – Consolidate data from disparate systems into a unified, usable analytics environment.
- **Data Quality & Validation** – Cleanse, normalize, and validate data to ensure accuracy, consistency, and auditability.
- **Data Governance & Standards** – Establish data definitions, ownership, controls, and governance frameworks.
- **KPI Development** – Define mission-aligned performance measures tied to strategic and operational objectives.
- **Dashboard & Visualization Development** – Create executive-ready dashboards and visual reports tailored to stakeholder needs.
- **Automated Reporting** – Reduce manual effort by automating recurring reports and data refreshes.
- **Advanced Analytics & Trend Analysis** – Analyze patterns, trends, and anomalies to support decision-making.
- **Forecasting & Scenario Modeling** – Support planning and risk mitigation through predictive analysis.
- **Data Architecture Design** – Design scalable analytics architectures aligned with Federal IT and security requirements.
- **System & Tool Integration** – Integrate analytics with enterprise platforms and reporting tools.
