

MISSION-DRIVEN DIGITAL MODERNIZATION

Empowering agencies to build faster, work smarter, and serve better.

Today's government missions demand modern digital solutions that are fast, flexible, and built to last. At Copper River Technologies (CRT) and Coho Consulting Group (CCG), our skilled professionals help agencies build and modernize applications that not only meet technical requirements but also drive real mission impact. Our digital platform philosophy starts with people, not products. We take a mission-first, human-centered approach to designing and delivering solutions that empower users and achieve real results. By focusing on intuitive, user-friendly experiences, we ensure that technology becomes an effective tool that supports the mission rather than standing in the way.

CUSTOMER BENEFITS

- *Increased Process Efficiency*
- *Real-Time Visibility and Reporting*
- *Improved User Experience*
- *Faster Access to Mission-Critical Tools*
- *Rapid, Flexible Deployment and Delivery*
- *Integration of Disparate Systems*
- *Secure and Compliant Applications*
- *Lower Total Cost of Ownership*

CAPABILITIES

We help agencies deliver modern digital capabilities that directly support mission outcomes and business operations:

- **Tailored Digital Applications:** Create new, purpose-driven applications from the ground up to meet specific mission or program needs.
- **Process Automation and Workflow Orchestration:** Streamline operations by reducing manual steps, accelerating approvals, and improving transparency across teams.
- **Legacy System Modernization:** Transform outdated systems into scalable, cloud-ready, and maintainable solutions.

PARTNERS

CRT and CCG offer a platform-agnostic approach to digital solutions, ensuring that technology choices are driven by mission needs, not vendor contracts. By working across ecosystems, from low-code to enterprise platforms, we deliver outcomes tailored to each client's unique goals and environment.
